

ORLEN OIL WHEEL CLEANER

General features:

Wheel Cleaner is an alkaline product for cleaning aluminium and steel surfaces of road residue and debris. With special anticorrosion additives, it prevents from corrosion and adverse effects of salt and sand. The product is acidfree and is harmless to the surface of alloy and steel rims and wheel bolts.

Application:

Product for cleaning dirt of all aluminium and steel surfaces in cars, trucks, motorbikes, bicycles and other equipment prone to oxidation and exposed to weather conditions. It removes road grime, breakdown brake dust, matting, oily spots and traces of rubber. Recommended for use on steel and alloy rims. Caution! Do not use on painted centre caps and plastic parts.

Package:

500 ml bottle with trigger

Physical and chemical properties:

Parameter	Units	Typical values
Color	organoleptic	clear
Density at 20°C	[g/cm ³]	0,970 – 0,990

NOTE: Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each product lot.
