

## ORLEN OIL SUPEROL A CB/SC 15W-40

### General features

- it reduces the wear of engine components
- it prevents the formation of sludge and carbon deposits
- It prevents jamming of piston rings
- it ensures the appropriate potential of dispersing and washing properties
- it has high dispersing and neutralizing potential TBN  $\geq 2,5$ mgKOH / g
- it shows good oxidation resistance
- stable oil viscosity during operation

### Application

Multigrade, mineral engine oil intended mainly for the lubrication of non-turbocharged diesel engines, vehicles, machines, other stationary and marine engines, for which an oil of API CB / SC quality level and SAE 15W-40 viscosity grade is recommended.

### Quality class

API : CB/SC

### Viscosity grad

SAE: 15W-40

### Physical and chemical properties

Parameters	Unit	Typical values
SAE viscosity grade	-	15W-40
kinematic viscosity at 100°C	mm <sup>2</sup> /s	13.5-16.3
viscosity index	-	130
flow temperature	°C	-24
ignition temperature	°C	210
base value TBN	mg KOH/g	2,5
<b>Note:</b> Physicochemical parameters listed in the table are typical values. Real values are stated in quality control certificates attached to each production batch.
